

# Cross-Cultural Considerations:

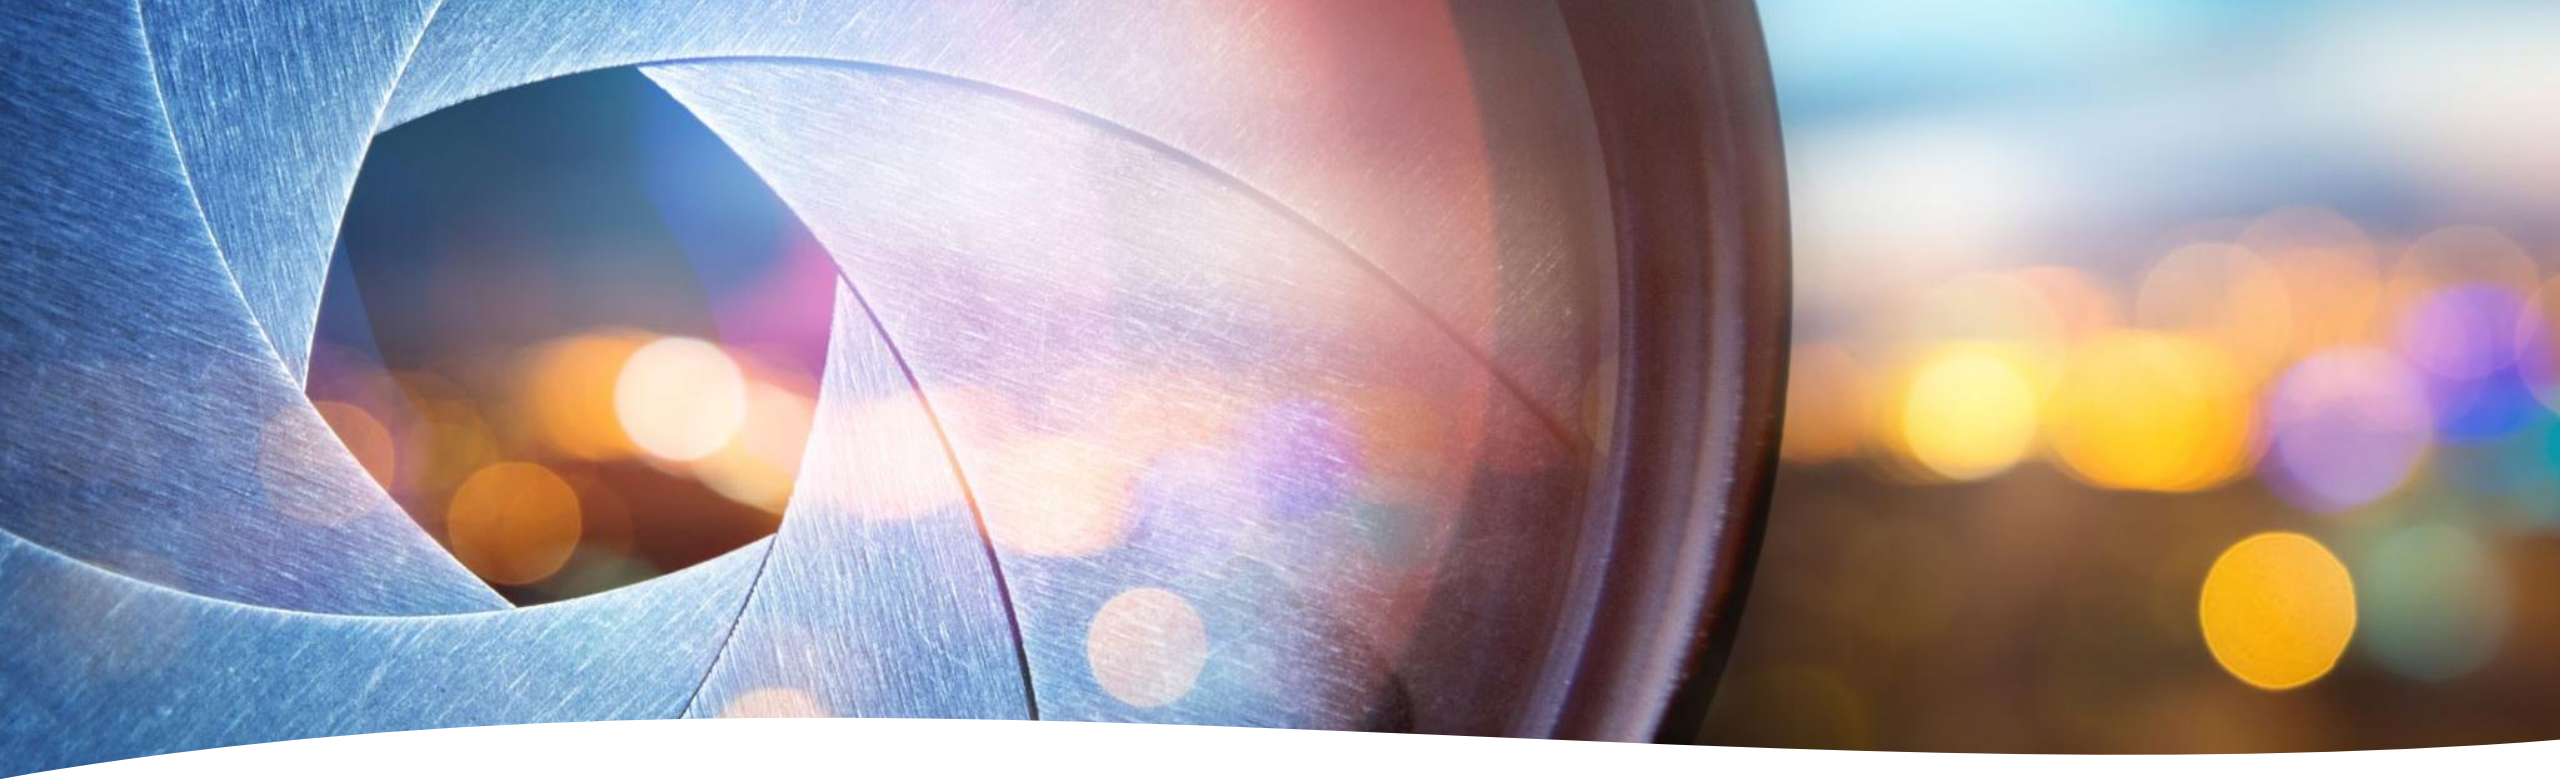

## Connecting Versus Colliding

Community Workforce Institute

James Figueiredo, Ed.M

## **True or False?**

1. Common sense is determined by culture.
2. Communication styles are rooted in culture.
3. To improve cross-cultural interactions, the first step recommended by experts is to understand the cultural values and beliefs of others.

# A Definition of Culture

---

Beliefs, values, customs, and social behavior shared by a group of people with common identity. Identity may be based on race, ethnicity, language, religion, sex, gender identity, sexual orientation, disability, health condition, education, income, place, profession, history, or other factors.

---

Culture also includes organizational cultures, which are reflected in how organizations deliver services.

# Important to Remember:

Culture varies from  
local group to group

Culture co-exists with  
individual distinctness

Culture endures and  
evolves – it is never  
static

Culture is our lens,  
and our learned view  
of life

# Stereotyping vs. Generalizing

What is the Difference?

## **Stereotype**

a "stopping point". A restrictive schema that is assumed to represent everything important about a person

## **Generalization**

a "starting point" from which a person can go on to more accurately understand the needs of an individual

"The problem with stereotypes is not that they are incorrect, but that they are incomplete.

**No one is a 'single story'."**

-Chimamanda Ngozi Adichie

# Bidirectional Ethnocentrism

---

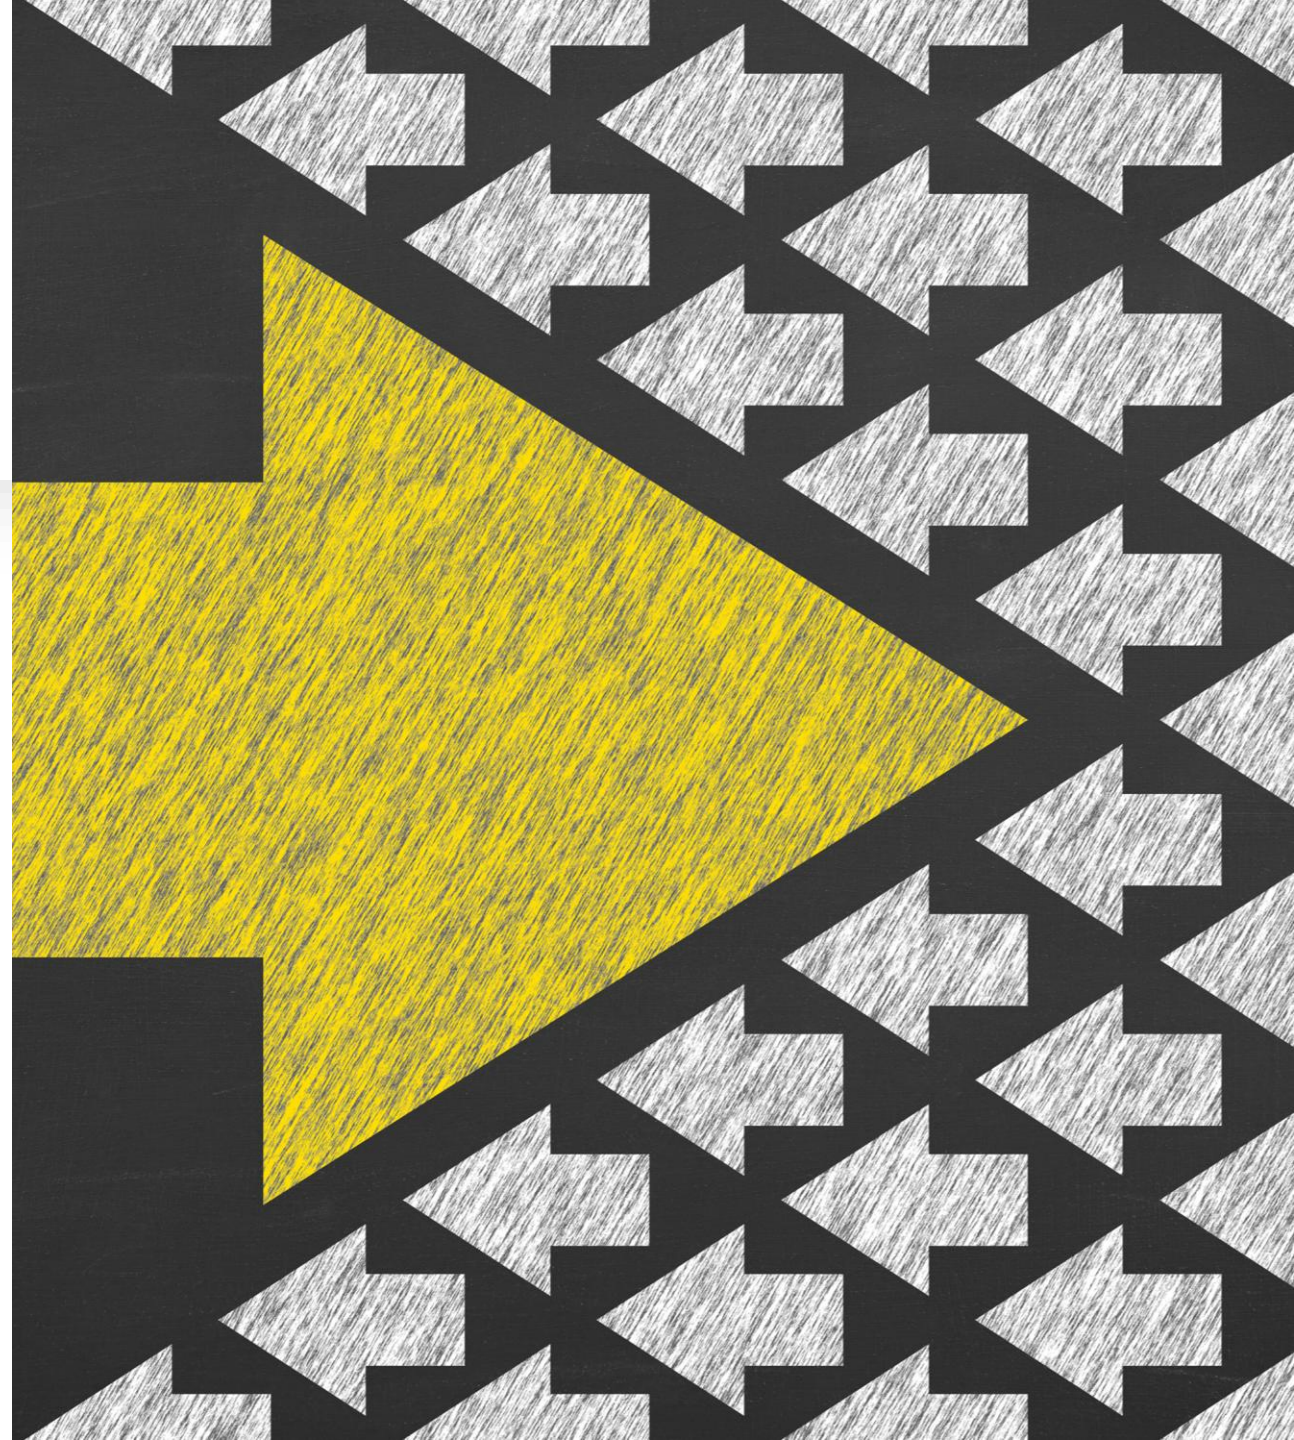

**Bidirectional** = In both directions.

---

**Ethnocentrism**= The tendency to view one's own culture, values, or norms as the "right" or "normal" way of being.

---

**Bidirectional ethnocentrism** happens when both parties feel disrespected or dismissed, and genuine empathy is blocked.

High Value Questions

## The Late Arrival

A peer coach arrives 10 minutes late to a multidisciplinary team meeting. The clinician sighs and says, “Time management is part of professionalism.” The peer shuts down and doesn’t speak again.”

1. What unseen cultural differences might be at play?
2. How could each person respond differently?
